

ASWATHY V K

MCA Candidate | Software Developer | Python & Web Development
Kerala, India | +91 9188240832 | aswathyvk832@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-oriented MCA candidate at CUSAT with hands-on experience in Python, full-stack web development, and applied machine learning. Proficient in Flutter, PHP, and MySQL, with a solid foundation in OOP principles, SDLC, and Agile methodologies. Demonstrated ability to independently design, build, and deploy functional software applications. Seeking an entry-level software development role to contribute technical skills and drive meaningful solutions.

EDUCATION

Master of Computer Applications (MCA)

July 2024 – July 2026 (Expected)

Cochin University College of Engineering Kuttanad (CUCEK), CUSAT, Kerala

Bachelor of Science in Mathematics

July 2020 – July 2023

Mahatma Gandhi College, Iritty, Kerala

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript

Frontend Development: HTML5, CSS3, Tailwind CSS

Backend Development: PHP

Mobile Development: Flutter (Dart)

Database Technologies: MySQL, SQL

Machine Learning: Linear Regression, Decision Tree (scikit-learn)

Tools & Platforms: Git, GitHub, VS Code, XAMPP, Linux

PROJECTS

RetailForecast -- ML-Powered Demand Forecasting App

Flutter, Python, MySQL

- Engineered a cross-platform Flutter mobile application that forecasts retail product demand using historical sales data, enabling data-driven inventory decisions for small businesses.
- Implemented and compared two ML models - Linear Regression and Decision Tree (via scikit-learn) - achieving demand prediction with measurable reduction in overstock and stockout scenarios.
- Designed and integrated a MySQL backend to store product and sales data, connecting it seamlessly with the Python ML pipeline and the Flutter frontend.

ChillSpot CUCEK -- Campus Community Web Platform

HTML, CSS, Tailwind, PHP, MySQL

- Developed a feature-rich campus web platform serving the CUCEK student community, supporting multiple functional modules including announcements, event listings, and social interaction.
- Built a fully dynamic backend using PHP and MySQL with complete CRUD operations, enabling real-time data management across all platform modules.
- Integrated a real-time chat feature and designed a fully responsive UI using Tailwind CSS, delivering a smooth user experience across desktop and mobile devices.

CERTIFICATIONS

Python Project for Data Science

August 2023

IBM / Coursera – Authorized online certification

KEY STRENGTHS

Analytical Problem-Solving • Cross-functional Collaboration • Adaptability • Self-directed Learning • Attention to Detail
